bag

A grid of empty rectangular boxes designed to fit the words from the list above. The boxes are arranged in a way that allows for the identification of the shape of each letter in the words. For example, the word 'zip' would be represented by three boxes: a tall one, a short one, and a short one. The grid contains 15 rows of boxes, each corresponding to a word from the list. The boxes are arranged in a way that allows for the identification of the shape of each letter in the words. For example, the word 'zip' would be represented by three boxes: a tall one, a short one, and a short one. The grid contains 15 rows of boxes, each corresponding to a word from the list.
